

The Python logo is a rounded rectangle with a gradient background transitioning from purple on the left to blue on the right. In the center is a red rectangle containing the word "PYTHON" in white, bold, sans-serif capital letters.

PYTHON

「Comments」

● Python Comments

Comments in any programming language are the lines in the code, that are ignored by the compiler during the execution of the program.

- It Enhance the ..
 1. Readability of the code,
 2. Stop the execution for particular set of code
 3. It Help the programmers to write the description for set of code/function for understanding
 4. Mentioned the Metadata information of the project

- Types of Comment :

1. Single Line Comments
2. Multi Line Comments

1. Single Line Comments

Comment the one/single statement

In Python we use, hash(#) to perform single line comment

Ex:

```
#I am Single line comment , Hence will not provide you any output
```

2. Multi Line Comments

Comment the one or more line of code .

In Python we use, `''' '''` or `""" """` to perform multi line comment

Ex:

2.1 `''' I am multi line comment , Hence will not provide you any output '''`

2.2 `""" I am multi line comment , Hence will not provide you any output """`

THANK

YOU
